

Serious Twitching/ Unique mixed species bird wave tour (WQBT01)

Trip Overview : The shortest tour package in birding, target to experience the mixed species bird flocks/ bird wave in Sinharaja Rainforest (A World Heritage Site). The noisy scattered calls and songs of birds in the mixed species bird flocks enhance the liveliness of the rainforest. We invite you to take part in this tour which definitely gives you an unforgettable birding experience for life with a chance to see the elusive, rare, endemic Serendib Scops Owl. In an average mixed species bird flock you can observe more than 15 bird species scattered in an approximate area, which includes several endemic birds. We urge you to get the maximum benefit out of this short trip with fantastic birding experience in this amazing Island.
